

Management System Kit Used for the Host of Serial PDA or Handheld PC

Abstract

5 A kind of "Management System Kit Used for the Host of
Serial PDA or Handheld PC (HHPC)" that can be used by the
host of PDA or handheld PC to manage or access data and brings
unlimitedly expandable capability to PDA with small memory
capacity. It is small and easily portable, and mainly
10 composed of a memory management system and a data conversion
control mechanism installed with a serial input/output
device, CPU, firmware program, storage device and power
supply. The data and programs in both of the PDA host and
the data conversion control mechanism are managed and
15 mutually delivered by embedding the memory management system
in the PDA host and connecting the PDA host to the data
conversion control mechanism through a serial port.
